

***A revolutionary coil cleaning solution***

**ANTRAC Technologies** introduces a revolutionary new kind of coil cleaner for condensers and evaporative coils.

**ANTRAC** is an industry leader for safe, non-toxic, and environmentally friendly cleaners. Our Coil Cleaner is no different! This latest development is a non-acidic blend of powerful, fast acting, bio-degradable, organic salts, specifically formulated to replace fuming acidic coil cleaning solutions. It also features an expanding foam formula designed to penetrate coil beds for a more complete cleaning. Trac Coil Cleaner is non corrosive, phosphate free, emits no V.O.C., and is safe for all metals.

**Advantages:**

- ◆ **Acid Free**
- ◆ **A True Green coil cleaner!**
- ◆ **Economical and simple to use!**
- ◆ **Eliminates need of storing toxic chemicals!**
- ◆ **Non fuming!**

**Safety:**

- As with all of AnTrac products, this solution is non-toxic, bio-degradable, safe to handle and easy to dispose of.
- **TRAC'S Coil Cleaner™** is safe for your maintenance personnel.
- Based on current EPA guidelines, our **Coil Cleaner™** is classified as biodegradable, non toxic, non-flammable and meets all requirements regarding hazardous and dangerous materials. Not regulated by D.O.T.

***Our Coil Cleaner™ is a concentrate and can be diluted. One gallon of will make 1 to 5 gallons of ready-to-use solution***

**Application:**

**COIL CLEANING DIRECTIONS**

- 1) Shut off power to condenser.
- 2) Spray coils from the outside only and let the coil cleaner soak for 10-15 minutes.
- 3) While you wait, remove the top part of the condensing unit with the fan attached. Electrical components should be covered to keep them from getting wet.
- 4) After 15 minutes, saturate the coils again from the outside and let the coil cleaner soak for 5 more minutes.
- 5) With a garden hose inside the condenser, spray the coils so the water sprays to the outside. Never spray the coils from the outside as the water may pack the debris tighter into the coils rather than pushing it out. Repeat until your rinse water runs clear through the coils.

**NOTE: FOR EVAPORATOR COIL CLEANING IT IS RECOMMENDED TO REMOVE THE EVAPORATIVE UNIT BEFORE CLEANING.**

**Availability**

1 gallon, 5 gallon pail, 55 gallon drum or a 250 gallon tote tank

**ACID FREE NON-FUMING SAFE NON-TOXIC BIODEGRADABLE NON CORROSIVE NON HAZARDOUS**
